

The Risk Report

The new benchmark in premium business risk reporting

The Risk Report from Experian has been introduced as a result of extensive customer and industry research. By understanding how you use the information, we've been able to help you make faster and better risk decisions.

Quite simply, The Risk Report is setting new standards for comprehensive, crystal-clear and cost-effective risk reporting.

Better data, better decisions

- Instant access to key corporate information via web links
- Assess company stability at a single glance with optional corporate tree
- Accurate, long-term view of a company's performance through Commercial Delphi twelve-month trend information
- Easy financial interpretation with analyst comments
- Comparison of the Commercial Delphi score with that of the population enables clients to have more context within which to make their decisions
- Shareholder information for a sharper insight into company status and a rapid understanding of any majority shareholdings
- Avoid unsolicited sales and marketing contact with telephone preference (TPS) & fax preference (FPS) flags

Managing risk

- Verification and authentication help protect the business against risk
- Potential fraud alerts quickly highlighting any cause for concern
- Easy to identify whether customers pay their invoices on time or not – to facilitate easy decision-making

New layout, new advantages

- At-a-glance decision making with single-page reports
- Save time and money with improved usability and readability
- Tabs and simple navigation make the information more manageable
- Easy search tools and risk summaries with clickable icons and simple colour coding

Better usability

- Simple icons and tabs
- Risk dashboard
- Single-screen layout
- Colour coding
- Trend indicators

Improved decision making

- All the most important information – on one screen
- Alerts you to adverse information to enable you to take action and protect your business

More data

- Company web address
- Parent and ultimate parent content and scores
- Corporate structure with risk score
- Inclusion of more shareholder information
- Commercial Delphi twelve-month history
- Analyst comments
- Potential fraudulent activity alerts
- TPS & FPS preference flags

- Balance sheet, cash flow and profit and loss
- Legal & payment information, including CAIS*, CCJs and CCLs
- Share Capital Structure
- Detailed shareholders
- Current & previous directors
- Documents & document images

Valuable extras for ongoing risk management

The Risk Report from Experian also opens a valuable window of information on your new customer, allowing you to choose from our range of additional expert services to maximise your customer relationship. These include **Business Monitoring**, an industry-leading credit and status monitoring service for both limited and non-limited businesses. Providing daily updates of your entire customer portfolio, Business Monitoring enables you to react quickly to changes in circumstances in order to protect your business and take advantage of new opportunities.

*Where applicable
