

Experian Data Breach Readiness Service: Response Ready

Helping organisations to create and manage their customer-facing notification and response plans

Why is it important to have a data breach plan in place?

There are several ways personal information, such as full name, address, bank card numbers, passport numbers and driving licences can be utilised fraudulently by criminals. These include the opening of accounts such as mobile phone contracts or utility services or apply for credit, such as credit cards or loans in an individual's name.

Any organisation handling sensitive consumer data at some point is going to face the challenge of an attempted or successful data breach. Putting a customer-facing response plan in place, which enables you to quickly notify and manage enquiries from those affected without 'undue delay' will be crucial at this time. And more importantly it could potentially help reduce an individuals' chance of becoming a victim of fraud.

How can we help organisations?

Experian's foundation data breach readiness service helps organisations to complete the essential steps of their customer-facing notification planning through Experian's online Readiness Hub.

Organisations can complete the key steps of their readiness plan within 25 days. During this process they are fully supported by a dedicated Senior Account Manager from Experian's Data Breach Response team.

What is included in the foundation-level Response Ready service?

Your dedicated Account Manager will work with you to gain access to the Readiness Hub and help you to complete each crucial step of your readiness plan. Once all steps are complete your response plan will be stored ready for when you need it.

By getting ready in advance you have the potential to reduce the time it takes to notify your at-risk customers or employees when a live incident hits by up to 84 hours.

Experian Data Breach Readiness Service

What are the key features of the foundation-level service?

Access to **Experian's Readiness Hub** to complete key steps in the planning process.

Development of your draft **notification letter/email** templates including branding, fonts and standard content, which are all stored ready for use.

Completion of a contact **data quality** health check up to 250,000 records to determine the quality of your contact data.

Review **credit/web monitoring** services and how this can support customers and employees.

Access to Experian's **Frequently Asked Questions** library from Experian's database of handling hundreds of data breaches.

Outline of Multi-lingual **call centre service resources to support Frequently Asked Questions**.

Review of **Free phone line coverage** resources and setup process.*

Storage of your **plan and assets** in readiness for a data breach incident.

Validate your contact data

We will perform a data hygiene health check which determines how many individuals can be successfully contacted in the event of a data breach.
